

RIDER ABILITY RATINGS

Beginner

Riders with very little or no riding experience. You will learn the fundamental skills of mountain biking to help you ride with proper technique and more confidence. Skills are taught in a controlled environment and then gradually taken to the trails.

Intermediate

Riders with some riding experience and who want to get out on more challenging terrain. Or anyone who has taken a beginner clinic or another entry-level camp before. Focus is on reviewing basics, breaking bad habits and learning skills required for more challenging trails. Some time is spent in a controlled environment but mostly on the trails.

Strong Intermediate

Riders that want to take their riding to the next level. Focus is on a more advanced skill set, faster paced riding and lots of time on the trail. Perfect for graduates of an Intermediate level camp.

Advanced

Riders that are fit and already confident with drops, jumps and steep, challenging terrain and want tips for riding faster, stronger and with better technique. They have quite a bit of riding experience or have excelled at a Strong Intermediate program.
